

Nature neighbors Volume 3 ; embracing birds, plants, animals, minerals, in natural colors by color photography; containing articles

This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1914 Excerpt: ...a minnow in the strong beak. Probably no bird labors more persistently in constructing a nesting site than these winged fishers. In the perpendicular side of a sand or gravel bank, they burrow horizontally with one or two upward turns to a depth of from four to six feet. Several burrows are often made, one of which is used by the male as sleeping quarters. At the end of the nesting burrow, a bowl-like place is scratched, and into this birds disgorge countless numbers of fish bones. These become bleached, and the six to nine pearly-white eggs may be found resting upon this crude nest of undigested matter. The eggs are usually laid in May and the period of incubation is two weeks. Under the name of halcyon, the Kingfisher was fabled by the ancients to build its nest on the surface of the sea, and to have the power of calming the troubled waves during its period of incubation; hence the phrase halcyon days. THE IVORY-BILLED WOODPECKER In size, though hardly in beauty, this is indeed the prince of woodpeckers, the largest of our North American species. Its length ranges from nineteen to twenty-one inches. There is one other woodpecker, called the Imperial, which is larger, measuring twenty-three or twenty-four inches in length. The Ivory-billed is now rare, and is apparently restricted to the extreme Southern States, especially those bordering the Gulf of Mexico. It is also found in western Mexico. It is of a wild and wary disposition, making its home in the dark, swampy woodlands. The dense cypress swamps of Florida are one of its favorite haunts. The nest of the ivory-bill is excavated in a tree, about forty feet from the ground, the cavity often being nearly

two feet in depth. Three to six glossy, pure white eggs are laid. This bird does not rema...
