

Introduction to Computer Science Using C++ (Workbook)

Covers computer science fundamentals using the language C++, and is appropriate for a variety of C++ courses. This hardcover, 2-color textbook is designed to help students prepare for the Advanced Placement Test for C++ (A and AB). It has been tested with popular DOS, Windows, and Macintosh compilers and is appropriate to use with each platform. Topics covered include programming methodology, advanced data structures, and algorithms. This text is an excellent way to get your students involved in the growing industry of Computer Programming. This book assumes no prior programming experience, but does assume a general working knowledge of computer systems. Disk files are C++ source code files in ASCII format. Completion time is two semesters (8, 12, and 6 week courses).
