

Photo Composition Mastery! (On Target Photo Training Book 9)

Photo Composition Mastery! New! Revised and expanded edition! Artistic composition is where the rubber meets the road...its the difference between a snapshot and a photograph you would be proud to hang on the wall! Here's the table of contents to show you a bit of what is covered: Introduction The Fastest Way To Master Your Camera Light Make Your Own Softboxes 3 Steps to Stunning Photography! Elements Of Composition Composition Defined Framing Elements Cultural/Psychological Positioning Physical Positioning Visual Framing Vignette Shape Size Space Mood Diagonals Symmetry/Asymmetry Shoot From A Unique Vantage Point Directing The Eye Leading Lines Horizontal, Vertical And Diagonal Leading Lines Photo Exercise 1 The Rule Of Thirds The Bulls Eye The Power Points The Power Lines Breaking The Rules Photo Exercise 2 Additional Photo Training Leading Lines - Leading lines are photo elements that will draw the viewer's eye into the photo (and keep it there). Plus, they direct attention to the main subject in the photo and make it read the way you envisioned it. Diagonal Lines - Diagonal lines in a photo are powerful! If you want to denote power and dynamism in your photos, use diagonal lines. The Rule Of Thirds - The old standby...the rule of thirds is probably the most well known compositional rule. We cover it to be complete. Who knows, maybe this is the first photo book you've read! And more...And more...And more... Between the text, sample photos and training exercises - this easy to understand volume will have you comfortable with all the photo composition concepts and shooting better photos in no time.
