

The Dawn of Massively Parallel Processing in Meteorology: Proceedings of the 3rd Workshop on Use of Parallel Processors in Meteorology (Topics in Atmospheric and Oceanic Sciences)

The Dawn of Massively Parallel Processing in Meteorology presents collected papers of the third workshop on this topic held at the European Centre of Medium-Range Weather Forecasts (ECMWF). It provides an insight into the state of the art in using parallel processors operationally, and allows extrapolation to other time-critical applications. It also documents the advent of massively parallel systems to cope with these applications.
