

Mastering Microsoft Visual C++ 4

This pack shows C programmers (beginners through experts) how to use Microsoft's revolutionary and incredibly difficult 32-bit Visual C++ 2.0 to create professional Windows 4.0 and Windows NT applications. It includes a disk that contains all of the source code and executable programs developed in the book. Procedures, sidebars and pointer notes that refer readers to detailed information within the manuals are included, as well as programming examples, hints and tips. Procedures, sidebars and specially designed pointer notes that refer readers to detailed information within the manuals are included, as well as practical real-world programming examples, programming hints and expert tips which give readers the foundations that will permit them to become experts at creating commercial-quality C++ programs.
