

# PIC Microcontroller Projects Cookbook

A collection of PIC-based projects designed and built over the years by the author. This book demonstrates the versatility of the PIC microcontroller. Projects include a 100-ft range IR transmitter, a solar powered LCD memorial plaque, an eht tester, a VGA multiplexer, a varicap controlled am radio, a digital sound recorder, a printer alarm, a sonic range meter with RS232, a video carousel, an IR PC link an electronic telephone book,a compact flash interface,a micro SD reader/writer and a 8 channel logic analyser.. Complete source code listings are provided for all the projects in the book.
