

Art in the City: London

London and Paris are the first two titles in a unique new series of city guides focusing on modern and contemporary art - a genuine gap in the art and travel market. Never before has the contemporary art scene of each city been so comprehensively researched and presented. The guides follow a sound formula -each opens with an essay on the current contemporary art scene by a local art expert in that city, followed by an introduction which presents the art in the context of the city's history and geography to give the reader a feel for the places they might like to visit. The central portion of the books are a fact-packed, stunning, visual A-Z guide to 100 artists, each featuring a representative piece of that artist's work, with an expert commentary and details of everywhere their art can be seen in the city. The A-Z is cross-referenced throughout to the Directory, a comprehensive listing of public and private galleries, public art, art colleges, art tours and other sites where the art can be seen. These in turn are cross-referenced to the maps - one large map on the inside the front cover and ten close-up maps later in the book. The back inside cover has a transport map, making each guide not just inspirational and informative but also practical. Whether you are planning a weekend break, a longer trip or just want to get to know the contemporary art scene in your own city better this series has something for everyone.
