

GO! with Office 2007 Getting Started

The primary goal of the GO! Series, aside from teaching computer applications, is ease of implementation, with an approach that is based on clearly-defined projects for students and a one of a kind supplements package. GO!'s project-based approach clusters the learning objectives around the projects rather than around software features. Teaches students to solve real problems as they practice and learn the features. GO! with Office 2007 Getting Started, 1/e provides introductory coverage of Office 2007 applications, including Windows XP, Word, Excel, Access and PowerPoint. MARK ET: Ideal for students and professionals seeking a conclusive introduction to Microsoft Office 2007 applications.
