

Snapshots of the Mind

Snapshots of the Mind is a collection of travel writing covering five decades and five continents. The pieces are not mere descriptions of lands and peoples but are evocative of the thoughts, emotions, and deductions that go with those strange and wonderful experiences that occur during travel. The writing shows more than the scenes that are susceptible to the camera's lens: It delves into the history, language, connections, and meanings of the experience. It is designed to persuade the reader to think and to travel.
