

Skin: The Complete Guide to Digitally Lighting, Photographing, and Retouching Faces and Bodies

Achieving accurate skin tones is one of the most challenging tasks in digital photography. Master this challenge with professional photographer Lee Varis as he covers a range of skin: women and men, young and old, various tones, in-studio and outdoors, tattoos, and more. His step-by-step tutorials and before-and-after illustrations demonstrate various techniques for topics such as digital-specific lighting challenges and what can and cannot be done in post-process. A free CD-ROM accompanies the book and contains sample image files to use while following the tutorials, plus equipment recommendations and technical reference materials that enhance and reinforce the instruction. Order your copy of this practical guide today and get a complete start-to-finish approach to integrating everything from posing models to shooting and retouching candid scenes.
