

# Fourth World Genesis: The Leaders of Kong Fu, Choreography of Human Expanse, Utopia at Hand

A new universal paradigm for humanity at the reach of our fingertips. This writing reveals the most enlightening, inspiring and revolutionary expose of the hidden origin of Kong Fu for the first time in human history. It also brings to light the universal human wisdom and empowerment and a consortium of consciousness at the frontier of the new world. Through this book, human genesis, understanding of consciousness, politics, economic thesis, sociology, philosophy, science, mind/body interactions, all have been reviewed and reexamined through a completely new, independent and global paradigm. We who awoken, rise and unite must regenerate, thus begins the civilization of the fourth world, the human genesis, the consorted paradigm and the dialogue with the enigmas of the universe. It comes a time in the life of a specie that the specie must become aware of what has happened to its existence. It must become conscientious and realize of what has been achieved through its life force and to become a proactive participant and creator of renewed universal dimensions. This turning point in the life of the specie is crucial, because the evolving process can no longer be done to it, the evolution can not be continued without its active comprehension and participation. Here is revealed the most vital endeavor of humanity which looks to its existence as a blueprint, in order to plan and create the true life at timeless cultural momentums.
