

The 2013 Import and Export Market for Pins and Needles of Iron or Steel, Base Metal Beads and Spangles, and Base Metal Fittings Used for Clothing, Handbags, and Travel Goods in Ukraine

On the demand side, exporters and strategic planners focusing on pins and needles of iron or steel, base metal beads and spangles, and base metal fittings used for clothing, handbags, and travel goods in Ukraine face a number of questions. Which countries are supplying pins and needles of iron or steel, base metal beads and spangles, and base metal fittings used for clothing, handbags, and travel goods to Ukraine? How important is Ukraine compared to others in terms of the entire global and regional market? How much do the imports of pins and needles of iron or steel, base metal beads and spangles, and base metal fittings used for clothing, handbags, and travel goods vary from one country of origin to another in Ukraine? On the supply side, Ukraine also exports pins and needles of iron or steel, base metal beads and spangles, and base metal fittings used for clothing, handbags, and travel goods. Which countries receive the most exports from Ukraine? How are these exports concentrated across buyers? What is the value of these exports and which countries are the largest buyers? This report was created for strategic planners, international marketing executives and import/export managers who are concerned with the market for pins and needles of iron or steel, base metal beads and spangles, and base metal fittings used for clothing, handbags, and travel goods in Ukraine. With the globalization of this market, managers can no longer be contented with a local view. Nor can managers be contented with out-of-date statistics which appear several years after the fact. I have developed a methodology, based on macroeconomic and trade models, to estimate the market for pins and needles of iron or steel, base metal beads and spangles, and base metal fittings used for clothing, handbags, and travel goods for those countries serving Ukraine via exports, or supplying from Ukraine via

imports. It does so for the current year based on a variety of key historical
