

Mexican Interiors : Art, Design & Decoration (Spanish and English Edition)

In architecture, the exterior space is based on its shape, image and the way it blends into the context, while the interior space conforms to technical-economic conditions and the functional needs of daily life, being able to meet its main goal: for people to live happily. Mexican Interiors is the sixth title and it begins a new collection focused on decor with a diversity of styles and shapes, needs and tastes, and the imagination and creative expression of the architect.
